

IN THE CLAIMS:

1. (Currently amended) A method for browsing ~~web sites~~ a web site using a browser program running on a computer, comprising the steps of:

~~(1) (a) receiving, from a server for a web site, a plurality of web page structures for web sites and a plurality of web page attributes for said web site, including information concerning said web sites; and said web site;~~

~~(2) (b) displaying said plurality of page structures and said plurality of page attributes in correlation with each other, on a screen for a user;~~

~~(c) receiving, from the user, an input selecting either ones of said plurality of page structures or ones of said plurality of page attributes; and~~

~~(d) in response to receiving said input from the user, dynamically changing the display of at least one of said plurality of page structures if ones of said plurality of page attributes were selected and dynamically changing the display of at least one of said plurality of page attributes if ones of said plurality of page structures were chosen, wherein the display that is dynamically changed reflects a correlation between said page structures and said page attributes.~~

2. (Currently amended) A web site browsing system, which includes a server holding information for ~~web sites~~ a web site and a browser connected to said server for browsing said web sites a web site, comprising:

~~(1) (a) means for requesting, from said server, a plurality of web structures of web pages at said web sites and a plurality of attributes of said web pages, and for receiving said plurality of page structures and said plurality of page attributes; and~~

~~(2) (b) means for displaying said plurality of page structures and said page attributes; in correlation with each other~~

~~(c) means for receiving, from the user, an input selecting either ones of said plurality of page structures or ones of said plurality of page attributes; and~~

~~(d) means for dynamically changing, in response to receiving said input from the user, the display of at least one of said plurality of page structures if ones of said plurality of page attributes were selected and dynamically changing the display of at least one of said plurality of page attributes if ones of said plurality of page structures were chosen,~~

wherein the display that is dynamically changed reflects a correlation between said page structures and said page attributes.

3. (Currently amended) The web site browsing system according to claim 2, wherein said page attributes are keywords included in said web pages at said ~~web sites~~ web site, a number of times said keywords appear, sizes of files, a number of files and dates files are updated.

4. (Currently amended) The web site browsing system according to claim 2, wherein said server includes means for using contents held by said server or by another web server to prepare said web page structures and said page attributes for said web pages at said ~~web sites~~ web site.

5. (Original) The web site browsing system according to claim 2, wherein said server includes means for upon receiving a request from said browser, transmitting to said browser a program that includes a command processor, a page attribute processor and a page structure processor, all of which are required to display said page structures and said page attributes in correlation with each other.

6. (Original) The web site browsing system according to claim 5, wherein said command processor includes means for, in accordance with a browser change manipulation performed by a user, displaying a command for changing a display of said page structures and said page attributes, as well as said page structures and said page attributes.

7. (Cancelled)

8. (Original) The web site browsing system according to claim 5, wherein said program includes means for displaying, together with said page structures and said page attributes, a list of command areas for changing the displays of said page structures and said page attributes.

9. (Cancelled)

10. (Cancelled)

11. (Currently amended) A web site browsing computer, which includes a communication device for communicating with another computer; and a display device for browsing and displaying ~~web sites~~ a web site by using a web site browser program, said web site browsing computer comprising:

(1) (a) means for receiving, via said communication device, page structures at ~~web sites~~ said web site and page attributes included in web pages from a computer holding information for ~~web sites~~ said web site; and

(2) (b) means for using said web site browser program to display said page structures and said page attributes; ~~in correlation with each other~~

(c) means for receiving, ~~from the user, an input selecting either ones of said plurality of page structures or ones of said plurality of page attributes; and~~

(d) means for ~~dynamically changing, in response to receiving said input from the user, the display of at least one of said plurality of page structures if ones of said plurality of page attributes were selected and dynamically changing the display of at least one of said plurality of page attributes if ones of said plurality of page structures were chosen, wherein the display that is dynamically changed reflects a correlation between said page structures and said page attributes.~~

12. (Currently amended) A computer, which includes a communication device for communicating with a different computer and a storage device for storing information for ~~web sites~~ a web site, comprising:

(1) (a) means for receiving web site contents via said communication device;

(2) (b) means for preparing, using said web site contents, a list of page structures for said ~~web sites~~ web site and a list of page attributes for web pages; and

BEST AVAILABLE COPY

(3) (c) means for transmitting, in accordance with a request from said different computer, said page structures and said page attributes for said ~~web-sites~~ web site to said different computer.

13. (Currently amended) A storage medium on which is stored a program for browsing web sites using a computer, said program permitting said computer to perform:

(1) (a) a function for receiving, from a server, page structures for said web sites and web page attributes, including information concerning said web sites; and

(2) (b) a function for displaying said page structures and said page attributes in correlation with each other such that a user can manipulate the display of said page structures and said page attributes but cannot change said page structures and said page attributes.
